**Good Clinical Practice (GCP)** is an international ethical and quality standard for the design, conduct, performance, monitoring, auditing, recording, analyses, and reporting of clinical trials, that provides assurance that the

- ✓ Rights, safety and well-being of human research participants are well protected.
- ✓ Data and reported results are credible and accurate

**Learning Objectives:**

- ✓ To seek cognizance towards principles of GCP, roles and responsibilities of various stakeholder involved in a clinical research/trial
- ✓ To understand current ethical and regulatory requirements for conducting clinical research/trial in India
- ✓ To be aware of the national ethical guidelines for biomedical and health research involving human participants by ICMR and national ethical guidelines for biomedical research involving children by ICMR
- ✓ To enable the participants to understand that by seeking compliance to GCP they can give public an assurance that the rights, safety and well-being of human participants are well protected and the data from the study results are credible and accurate

**Who can attend?**

- ✓ Members of ethics and scientific committees.
- ✓ Practicing clinicians, Faculty members, Senior Residents and PGs.
- ✓ Research scholars in Biomedical Sciences, Pharmaceutical Sciences and Pharmacy Practice.
- ✓ Hospital/Health care administrators
- ✓ Industry/Institution/Academia

**Number of participants:** Thirty only [30]

**How to register?**

Registration can be done online mode for the selected candidates from each departments.

**How to reach us?**

Respected Madam/Sir,

This is in continuation of our letter dated 2 January 2024 regarding undertaking of various suggested activities towards the implementation of Nasha Mukta Bharat Abhiyaan (NMBA). A copy of the letter is enclosed for ready reference.

The Higher Education Institutions (HEIs) are requested to share the activities undertaken by them in the Google form.

It would be appreciated if the above information is conveyed to us by 15<sup>th</sup> July 2024.

With regards,

Yours sincerely,

  
(Deepak Vats)

### MONTHLY TRAINING PROGRAMME

TOTAL MARKS :20MARKS

NAME OF TRAINEE: Ganesh Sonawane

SUBJECT: LABORATORY SAFETY

NAME OF THE TRAINER: DR.RUTA . ANANDGAONKAR

MONTH:DECEMBER 2024

DATE: 23/12/2024

1. What is the most appropriate attire when working in a laboratory?

- a) T-shirt and shorts shoes
- b) Lab coat, safety goggles, and closed toe shoes
- c) Long flowing dress or skirt
- d) sandals and flip-flops

2. When should you wear gloves in the lab?

- a) Only when handling dangerous chemicals
- b) Only when using sharp objects
- c) Always when working in the lab
- d) Gloves are optional.

3. Which of the following is an appropriate action if you get a chemical in your eyes?

- a) Wait for it to evaporate on its own
- b) Rinse your eyes with water for at least 15min and seek immediate medical attention.
- c) Rub your eyes vigorously to get the chemical out
- d) Ignore it, as most chemicals are harmless to the eyes.

4. What should you do if you find an unlabeled chemical in the lab?

- a) Use your hands to pick up the broken glass and mercury
- b) Call for help and leave the area immediately
- c) Pour water over the mercury to clean it up
- d) Ignore the spill and continue working

5. What should you do if you find an unlabelled chemical in lab?

- a) Use it for your experiment as long as it look similar to what you need
- b) Dispose it of in the trash immediately
- c) Ask your lab mate if they know what it is
- d) Report it to your lab supervisor and do not use it.

6. How should you carry sharp objects, such as scissors or scalpels, in the lab?

- a) By holding them pointed down by your side
- b) By passing them directly to your lab partner
- c) By carrying them with the sharp edges exposed
- d) By using a container or holder to transport them safely.

7. Which of the following should you do if there is a fire in the lab?

- a) Attempt to put it out yourself using water or the closest extinguisher
- b) Immediately evacuate the lab and alert others on your way out
- c) Try to move any hazardous chemicals away from the fire
- d) Continue working and ignore the fire if it seems small.

8. Safety in the instructional laboratory is

- a) The responsibility of the professor only
- b) The responsibility of the student only
- c) A shared responsibility
