

## **MGM INSTITUTE OF HEALTH SCIENCES**

(Deemed to be University u/s 3 of UGC Act, 1956) Grade 'A<sup>++</sup>' Accredited by NAAC

Sector-01, Kamothe, Navi Mumbai -410 209 Tel 022-27432471, 022-27432994, Fax 022 -27431094 E-mail: registrar@mgmuhs.com; Website :www.mgmuhs.com

#### **Amended History**

- 1. Approved as per AC-41/2021, [Resolution No. 4.34.i], Dated 27/08/2021.
- 2. Amended upto AC-42/2022, [Resolution No. 3.32], Dated 26/04/2022. (Incorporate at the end of syllabus).
- 3. Amended upto AC-44/2022, [Resolution No. 5.38], Dated 09/12/2022.
- 4. Amended upto AC-46/2023, [Resolution No. 5.25], [Resolution No. 5.26] Dated 09/12/2022.
- 5. Amended upto AC-49/2024, [Resolution No. 4.25], Dated 25/04/2024.
- 6. Amended upto AC-50/2024, [Resolution No. 4.116], Dated 27/11/2024.

**Resolution No. 4.34.i of AC-41/2021:** Resolved to approve the changes in "Syllabus & Assessment Scheme" in Medicine & Allied, from CBME batch (UG) admitted in 2019 onwards

HOME ASSIGNMENT	SEMINAR	CONTINUOUS CLASS TEST LMS	MUSEUM LIBRARY STUDY ASIGNMENT		ATTENDANCE THEORY
			SI		
15	15	30	15	15	10

#### **1.** Home assignments

#### T L METHOD – Problem base study

Students will be asked to do home assignments on various Problem based questions, Give reasons, SLOT etc.

#### 2. Seminar –

Group of 5-6 students will prepare and present the seminar on the topics or syllabus covered in previous phases

#### **3. CONTINUOUS CLASS TEST (LMS)**

Class test will be conducted during theory classes once in 2 weeks in the first 15b minutes on the topics covered in last 2 weeks.

#### 4. Museum study Module (draft)

#### As Continuous Internal Assessment (Theory)

#### Marks 15

#### For PHASE - III / IV (as per decision)

T-L method: SGT / SDL

Students will be sent in small group of 25-30 students to the dept of anatomy/pathology for museum study and will study the specimens and slides related to topics in General Medicine.

e.g.

1. Malaria – Peripheral smear examination OR malaria antigen test

2. Diabetes Mellitus - examination of specimen of Amputated foot

3. Liver cirrhosis-Different specimens of liver cirrhosis will be studied

4. Anemia and blood disorders – slides 0f different types of Anaemia and blood disorders will be studied.

Attendance Record will be taken from the dept they will visit Feedback from the students will be taken

#### 5. Library Assignment Module (draft)

As Continuous Internal Assessment (Theory)

Marks 15

For Phase- II/III/IV (as per decision)

#### T L Method- SDL

Students will be divided in groups of 5-6.

They will be given different topics to study in Library/e Library.

They will have to prepare Power Point presentation on the given topic in the dept.

Attendance

Photographs

Feedback from the students

#### 6. Marks for Attendance -

At the end of phase 4 cumulative attendances of each student will be calculated and marks will be given accordingly.

Time for viva-

Long case- 10 minutes

Short case 2-7 minutes

Short case 1- OSCE- 10 minutes

## Attitude, Ethics and Communication

## (AETCOM)

## **Competencies for the**

## **Indian Medical Graduate**

## 2018

## **Medical Council of India**

# Pocket-14, Sector-8, Dwarka,

## New Delhi 110 077

**Resolution No. 5.38 of Academic Council (AC-44/2022):** Resolved to add one short note in Theory Paper II General Medicine on Bioethics for undergraduate MBBS from the batch joined in 2019 (CBME Batch) onwards [ANNEXURE-37] (pg 55 onwards/module 4.1, 4.6, 4.8).

## **Module 4.1: The foundations of communication - 5**

#### Background

Communication is a fundamental prerequisite of the medical profession and beside skills is crucial in ensuring professional success for doctors. This module continues to provide an emphasis on effective communication skills. During professional year phase III part II (year four), the emphasis is on communicating, diagnosis, prognosis and therapy effectively.

#### **Competencies addressed**

The student should be able to:	Level
1. Demonstrate ability to communicate to patients in a patient, respectful, non-threatening, non-judgmental and empathetic manner	SH
2. Communicate diagnostic and therapeutic options to patient and family in a simulated environment	SH

#### **Learning Experience**

Year of study: Professional year 4

**Hours:** 5(1+2+2)

- i. Introductory small group session 1 hour
- ii. Focused small group session 2 hours
- iii. Skills Lab session 2 hour

#### **Contents:**

This module includes 3 inter-dependent learning sessions:

- 1. Introductory small group session on the principles of communication with focus on administering communication, of diagnosis, prognosis and therapy.
- 2. Focused small group session with role play or video where students have an opportunity to observe critique and discuss common mistakes in communicating diagnosis, prognosis and therapy.
- 3. Skills lab sessions where students can perform tasks on standardised or regular patients with opportunity for self critique, critique by patient and by facilitator.

#### Assessment

- 1. **Formative:** Participation in session 2 and performance in session 3 mentioned above may be used as part of formative assessment.
- 2. **Summative:** A skills station in which the student may communicate a diagnosis management plan and prognosis to a patient.

#### Resources

Same as Module 3.1

# Module 4.6: Case studies in ethics and the doctor - industry relationship

#### Background

This module discusses some nuances in the professional relationships and conflicts there of (also see module 2.5).

#### **Competency addressed**

The student should be able to:	Level
Identify conflicts of interest in patient care and professional relationships and describe the correct response to these conflicts	SH

#### **Learning Experience**

Year of study: Professional year 4

#### Hours: 5

- i. Introduction of case 1 hour
- ii. Self-directed learning 2 hours
- iii. Anchoring lecture 1 hour
- iv. Discussion and closure of case 1 hour

#### **Case: The Offer**

You get a call from the secretary of the promoter of the largest and most successful corporate hospital in the city asking for an appointment for you with him. You are perplexed but make it to the appointment. You enter a large well appointed room. The owner of the hospital gets up from his chair, welcomes you and asks you to sit down.

"Welcome to our hospital, doctor." After a few minutes of empty banter, he says – "My marketing executives tell me that you are the most successful practitioner in this area. As you know, we are a growing organisation; we are eager to partner with you. Doctor, I know that you use the services of another hospital here but we can make it worth your while to consider". You look enquiringly. He continues. "In addition to your professional charges that you can determine, we can provide you with 20% of the hospital's collections from your patient including radiology and laboratory charges. If you send us your outpatients for consultations, laboratory or radiology we will give you back 30% of our collections. We hope that you will consider this, doctor and become part of our extended family."

#### **Points for discussion:**

- 1. Fee splitting and other practices.
- 2. Can doctors become entrepreneurs?
- 3. Can doctors own pharmacies or hold stock in pharmaceutical companies?
- 4. What comprises professional conflict of interest?

#### Assessment

- 1. **Formative:** The student may be assessed based on their active participation in the sessions.
- 2. Summative: Short questions on: 1) Fee splitting and its implications for patient care,

2) Conflicts in professional relationships.

### Module 4.8: Dealing with death

#### Background

Thanatology is a branch of science that deals with death. Death is an event that any medical student will inevitably face during the course of their professional career. Dealing with death empathetically and at the same time not being overwhelmed by it is an important coping skill for doctors.

#### **Competencies addressed**

The student should be able to:	Level
1. Identify conflicts of interest in patient care and professional relationships and describe the correct response to these conflicts.	SH
2. Demonstrate empathy to patient and family with a terminal illness in a simulated environment.	SH

#### **Learning Experience**

Year of study: Professional year 4

Hours: 5

- i. Introduction of case 1 hour
- ii. Self-directed learning 2 hours
- iii. Anchoring lecture 1 hour
- iv. Discussion and closure of case 1 hour

#### **Case: The Empty Bed**

You are a house surgeon in the night shift of the ICU. A 19 year old girl Sharmila is wheeled into the ICU. She has a complicated history. She had surgery for cyanotic congenital heart disease at age 8. She has a history of severe asthma often requiring admission for steroids. She lives in a home near a construction site and recently the attacks have flared up. She now has frequent admissions for asthma exacerbations. She is now constantly on steroids. In the last month, she has had 3 admissions. But she fights it bravely. She carries her books with her when she comes in and after the attack settles down she sits quietly reading. Despite the struggle you noticed that the staff nurses liked her. She was positive and charming. Today was no different but the attack seemed worse. In the ER, the FEV1 was horrible. They had pumped her with steroids, put her on continuous nebulization, an aminophylline infusion was in place when you received her. The smile was smaller but there. The face was cushingoid with all the steroids and the body looked tired. She was moved to her usual bed number 9. Your shift was getting over at 7 a.m. but you stayed on an hour. She looked better, the smile was back you reassured her and said I'll be back in the evening and left.

That evening you report for duty and as you look through the patients, bed number 9 is empty. "Have you discharged Sharmila?" you asked the nurse. No doctor – she developed a sudden cardiac arrest at 12 noon – we could not revive her.

#### **Points for discussion:**

- 1. How should doctors deal with the emotions of patients and family facing death?
- 2. What does the patient experience when he/she is dying? Can physicians make the process of death comfortable?
- 3. What are the emotions faced by doctors when confronting death in patients? Is death a defeat for the doctor? Should the doctor be emotionally detached from a dying patient?
- 4. What are the cultural aspects of dying?

#### Alternate Case: I have decided to die

You are a physician in a community care practice for over 20 years and caring for various patients. Mr. Bhaskara Rao is a patient in your care for the past 14 years. He is 76 years old and has diabetes for the past 30 years. He had renal failure for the past 10 years and is CKD stage V requiring dialysis for 3 years. While he is following up with the nephrologist he values your position in his family as a family doctor and regularly visits you to check if his treatment is correct and more often to seek reassurance. He has invited you to all his family events – the last being one month ago for his grandson's wedding.

This morning you get a call from him. "Doctor! He says in his usual cheerful voice. Can I meet you tomorrow? I have fulfilled all my responsibilities in life. I am not sad. My children are all settled; my grandson is married; my wife as you know is no more. I have decided to stop my dialysis and say goodbye to this world. I thought I'll talk to you about how to prepare for my death!"

#### Learning Experience

Year of study: Professional year 4

#### Hours: 5

- i. Introduction of case 1 hour
- ii. Self-directed learning 2 hours
- iii. Anchoring lecture 1 hour
- iv. Discussion and closure of case 1 hour

#### **Points for discussion:**

- 1. Can patients choose to die? Is there a role for doctors in the death of patients? Can doctors assist death?
- 2. How should doctors deal with the emotions of patients and family facing death?
- 3. What does the patient experience when he/she is dying? Can physicians make the process of death comfortable?
- 4. What are the emotions faced by doctors when confronting death in patients? Is death a defeat for the doctor? Should the doctor be emotionally detached from a dying patient?
- 5. What are the cultural aspects of dying?

#### Assessment

- **1. Formative:** Participation in sessions may be used as part of formative assessment. Submitted narrative on the socio cultural aspects of death may be used as assessment.
- 2. **Summative:** Short question on assisted dying.
