As I have experience of staying in a co-education boarding school. The environment I've been exposed to has made me a quality leader for the class in academic as well as sports co-curricular activities & I guess the students be it girl or a boy liked to work under my leadership. I believe I might be able to communicate the gap between girls & boys, women & men in my colleges as well as all the places I will visit throughout my life & bridge the gap between which discriminate both the genders.

## - | About the College

MGM School of Biomedical Sciences has been formed under MGM IHS with the vision of offering basic allied science and Medical courses for students who aspire to pursue their career in the allied health sciences, teaching as well as medical research.

School of Biomedical Sciences is dedicated to the provision of the highest quality education in basic medical sciences by offering a dynamic study environment with the labs which are well equipped and through extensive field work. The school encompasses 16 courses each with its own distinct, specialized body of knowledge and skill. This includes 7 UG courses and 9 PG courses. The college at its growing years started with just mere 100 students has recorded exponential growth and is now a full-fledged educational and research institution with the student strength reaching approximately 538. Presently there are very few institutions which impart proper training to the paramedical staff in a protocol based manner. MGMSBS is committed to provide quality training in the enormous fields of paramedical sciences. The postgraduate students are sensitized to research in the field of Diagnosis, drug delivery, clinical trial and product prototype development in first year itself.

## - | About Workshop

Gender Sensitization is one basic requirement for the normal development of an individual. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender and in some acute cases even him or herself. We believe in making students learn about 'respect' for people irrespective of the genders. Therefore, the need for this sensitivity has been felt and one day workshop is organized to address students and faculties ON Gender Sensitization.
