

MGM INSTITUTE OF HEALTH SCIENCES

(Deemed to be University u/s 3 of UGC Act, 1956)

Grade 'A' Accredited by NAAC

Sector-01, Kamothe, Navi Mumbai -410 209 Tel 022-27432471, 022-27432994, Fax 022 -27431094

E-mail: registrar@mgmuhs.com; Website :www.mgmuhs.com

COMPETENCY BASED MEDICAL EDUCATION (CBME)

(with effect from 2019-2020 Batches)

Curriculum for

Third M.B.B.S – Part II
Obstetrics & Gynecology

Amended up to AC-48/2023, Dated 12/12/2023

Amended History

- 1. Approved as per AC-41/2021, Resolution No. 5.4, Dated 27/08/2021.
- 2. Amended as per AC-44/2022, Resolution No. 5.48, Dated 09/12/2022.
- Amended as per AC-46/2023, Resolution No. 5.36, Dated 28/04/2023.
 Amended as per AC-48/2023, Resolution No. 5.28, Dated 12/12/2023.

Resolution No. 5.4 of AC-41/2021: Resolved to approve the "Curriculum, Assessment Pattern (Theory, Practical and Internal Assessment) and Logbook of OBGY.", which is prepared according to CBME guidelines, to be implemented from UG admission batch of 2019 onwards

Annexure-60A of AC-41-2021

MGM INSTITUTE OF HEALTH SCIENCES SYLABUS OBSTETRICS AND GYNAECOLOGY DEPARTMENT

CBME MBBS Phase- II, Phase-III, Part-I, and Phase- III, Part- II

<u>Learning Objectives for Competency Based Undergraduate Curriculum for the Indian Medical Graduate</u>

MGM INSTITUTE OF HEALTH SCIENCES SYLABUS OBSTETRICS AND GYNAECOLOGY DEPARTMENT CBME MBBS Phase- II, Phase-III, Part- I, and Phase- III, Part- II

Theory

1. Phase – 2 4 Weeks

2. Phase -3 Part -1 4 Weeks

3. Phase -3 Part -2 8+4 Weeks = 12 Weeks

Total 20 Weeks

<u>Phase - 2</u>

Deficie and discuss the interest of the principles and discuss the development and anatomy of the female reproductive tract, relationship to other pelvic organs, applied anatomy as related to Obstetrics and Cymacology. G63.1 Describe the physiology of ovulation, menstruation, fertilization, implantation and gametogenesis. G64.1 Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis. G65.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum care G65.2 Determine maternal high risk factors and verify immunization status. G66.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. G67.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. G68.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors. G68.2 Elicit document and present an obseletio history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history. G68.3 Describe, demonstrate, document and perform an obstetricial examination including a general and abdominal examination and clinical monitoring of maternal and fatal well-being; Describe and demonstrate period and surgical relationship of the principles of management of abortions including threatened, incomplete, including period proprieto and principles of management of an abortions including threatened, incomplete, including period proprieto and management of blocks and the management of labor, and management of bid period proprietors and management of unionary tracl infections in pregnancy G612.1 Describe and discuss the physiology o	Na CC	
Describe and discuss the development and anatomy of the female reproductive treat, relationship to other petric organs, applied anatomy as related to Obstetrics and Gynaecology. Describe the physiology of ovulation, mentstrustion, fertilization, implantation and gametogenesis. DG4.1 Describe, of placenta, and teratogenesis influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis. Describe, discuss and identify pre-existing medical disorders and discuss the basic sus evidence-based intrapartum care Describe, discuss and identify pre-existing medical disorders and discuss the management; discuss evidence-based intrapartum care Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. Describe and priend of gestation; screening for high-risk factors. Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history Describe and demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; Describe and demonstrate pelvic assessment in a model Classify, define and discuss the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic Describe the eliopathology, impact on maternal and fetal health and principles of management of ultriary tract infections in pregnancy on the disease and impagnancy on disease and impagnancy on disease and impagnancy on disease and impagnancy on d	No OG	Define and discuss still high and abouting
reproductive tract, relationship to other pelvic organs, applied anatomy as related to Obstetrics and Gynaecology. G3.1 Describe the physiology of ovulation, menstruation, fertilization, implantation and gametogenesis. G4.1 Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis G5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum care G5.2 Determine maternal high risk factors and verify immunization status G6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. G6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. G6.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. G68.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors. G68.2 Elicit document and present an obseletric history, comorbid conditions, past medical history and surgical history. G68.3 Describe, demonstrate, document and perform an obseletrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; G69.5 Describe and demonstrate pelvic assessment in a model G69.1 Classify, define and discusses the aetiology and management of abortions including theretaened, incomplete, inevitable, missed and septile. G69.5 Describe he etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum G69.5 Describe he discusses the physiology of pregnancy complications and management of uniany tract infections in pregnancy. G69.6 D		
anatomy as related to Obstetrics and Gynaecology. Describe the physiology of ovulation, menstruation, fertilization, implantation and gametogenesis. OG4.1 Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of plazenta, and teratogenesis of plazenta, and teratogenesis OG 5.1 Describe, discuss and identify pre-avsiting medical disorders and discuss their management, discuss evidence-based intrapartum care OG5.2 Determine maternal high risk factors and verify immunization status Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the gental tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation, screening for high-risk factors. Elicit document and present an obstetric history including menstrual history, last menstrual period. OG8.2 Elicit document and present an obstetric history, comorbid conditions, past medical history and surgical history OG8.3 Describe demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; OG9.1 Classify, define and discusse the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum Of12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management disease and pregnancy complications and management of urinary tract infections in pregnancy OG12.1 Describe and discuss the physiology of lactation OG13.1 Enumerate	OG 2.1	
OG3.1 Describe the physiology of ovulation, menstruation, fertilization, implantation and gametogenesis. OG4.1 Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis OG 5.1 Describe, discuss and identify pre-existing medical discreters and discuss their management; discuss evidence-based intrapartum care OG5.2 Determine maternal high risk factors and verify immunization status OG6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential disgnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors. Elicit document and present an obsetire instory including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history. OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination including a present and examination including a general and abdominal examination including a present and examination including a present		
implantation and gametogenesis. Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis of pregnancy, derive and discuss evidence-based intrapartum care OG5.2 Determine maternal high risk factors and verify immunization status Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the genital tract, cardiovascular system, repsipartory, haematology, renal and gastrointestinal system in pregnancy OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation, screening for high-risk factors. OG8.2 Elicit document and present an obstetic history including mensitual history, last mensitual period, previous obstetir history, comorbid conditions, past medical history and surgical history. OG8.3 Describe, demonstrate, document and perform an obstetirical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; OG8.5 Describe and demonstrate period assessment in a model Classify, define and discusses the aetiology and management of abortions including threatened, incomplete, inevibable, missed and septic OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and comulations of diabetes in pregnancy Describe the etiopathology in pregnancy on the disease and impact of the disease on pregnancy complications	062.1	
Describe and discuss the basic embryology of fetus, factors influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum care OG5.2 Determine maternal high risk factors and verify immunization status OG6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation, screening for high-risk factors. Elicit document and present an obstetric history including menstrual history, last menstrual period. previous obstetric history, comorbid conditions, past medical history and surgical history OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; OG9.1 Classify, define and discusse the aetilogy and management of abortions including threatened, incomplete, inevitable, missed and seption. OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and celus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the etiopathology of normal labor, mechanism of labor in cucliding partogram; conduct of labor, pain relief; principles of induction and acceleration of labor management of the principles of induction and acceleration of labor management of business and management of breast feeding OG17.1 Describe and d	063.1	
influencing fetal growth and development, anatomy and physiology of placenta, and teratogenesis of pregnancy, derive and discuss the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy. OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation, screening for high-risk factors. COG8.2 Elicit document and present an obstetic instory including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history. OG8.3 Describe, demonstrate, document and perform an obstetic instory, comorbid conditions, past medical history and surgical history. OG8.5 Describe and demonstrate period assessment in a model OG9.1 Classify, define and discusses the aetiology and management of abortions including a general and abdominal examination and spiric besories of management of hyperemesis gravidarum OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and complications of diabetes in pregnancy OG12.5 Describe the etional feature, delection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Criteria and discuss the physiology of properium, its conditions and management of the disease on pregnancy complications and management of labor including parto	OG/L1	
of placenta, and teratogenesis. Describe, discuss and identify pre-existing medical disorders and discuss their management, discuss evidence-based intrapartum care OG5.2 Determine maternal high risk factors and verify immunization status OG6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principles underlying and interpret pregnancy tests. OG7.1 Describe and discuss the changes in the genital tract, cardiovascular system, respiratory, haematology, renal and gastrointestinal system in pregnancy OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors. OG8.2 Elicid document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; OG9.1 Classify, define and discusses the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic. OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management of disebes in pregnancy OG12.1 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of uniary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in cocipio-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor, management of the presentation; monitoring	004.1

Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; Describe and demonstrate pelvic assessment in a model Classify, define and discuses the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy. Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of uninary tract infections in pregnancy. Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor, management of third stage of labor. Describe and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization Counsel in a simulated environment, cortraception and puerperal sterilization Describe and discuss the physiology of, berperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization Describe and discuss the physiology of, characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management		
examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being; Describe and demonstrate pelvic assessment in a model Classify, define and discuses the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic G99.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy G613.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor; pain relief; principles of induction and acceleration of labor; management of third stage of labor. G616.1 Enumerate and discuss scauses, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management	0000	
clinical monitoring of maternal and fetal well-being;	UG8.3	
OG8.5 Describe and demonstrate pelvic assessment in a model OG9.1 Classify, define and discuses the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy and labor, and complications of diabetes in pregnancy and labor, and complications of diabetes in pregnancy of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor; pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperi		
Classify, define and discuses the aetiology and management of abortions including threatened, incomplete, inevitable, missed and septic OG9.5 Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	068 5	Describe and demonstrate nelvic assessment in a model
abortions including threatened, incomplete, inevitable, missed and septic Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilisation OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management		
Septic Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG9.1	
Describe the etiopathology, impact on maternal and fetal health and principles of management of hyperemesis gravidarum OG12.3 Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OE35.5 Determine gestational age, EDD and obstetric formula		
Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy and labor, and complications of diabetes in pregnancy complications and management of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Council Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilization OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG9 5	
Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	003.3	
diagnosis, investigations, criteria, adverse effects on the mother and foetus and the management during pregnancy and labor, and complications of diabetes in pregnancy OG12.5 Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy OG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG12.3	
complications of diabetes in pregnancy Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy GG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. GG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage GG17.1 Describe and discuss the physiology of lactation GG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding GG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization GG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation GG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management GG35.5 Determine gestational age, EDD and obstetric formula		diagnosis, investigations, criteria, adverse effects on the mother and
Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy G13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. G16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		foetus and the management during pregnancy and labor, and
disease and impact of the disease on pregnancy complications and management of urinary tract infections in pregnancy Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
management of urinary tract infections in pregnancy Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG12.5	
DG13.1 Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. DG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage DG17.1 Describe and discuss the physiology of lactation CG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization DG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management DG35.5 Determine gestational age, EDD and obstetric formula		
of labor in occipito-anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG13.1	
induction and acceleration of labor; management of third stage of labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
labor. OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		including partogram; conduct of labor, pain relief; principles of
OG16.1 Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
management, appropriate use of blood and blood products in postpartum haemorrhage OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG16 1	
Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	0010.1	
OG17.1 Describe and discuss the physiology of lactation OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
OG17.2 Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG17.1	
and the technique of breast feeding OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
OG19.1 Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	0017.2	
complications, diagnosis and management; counselling for contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG19 1	
contraception, puerperal sterilization OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
OG19.2 Counsel in a simulated environment, contraception and puerperal sterilisation OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula		
OG22.2 Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management OG35.5 Determine gestational age, EDD and obstetric formula	OG19.2	Counsel in a simulated environment, contraception and puerperal

for self-protection against HIV and hepatitis and counsel patients		Tor self-protection against HIV and nepatitis and counsel patients

<u>Learning Objectives for Competency Based Undergraduate Curriculum for the Indian Medical Graduate</u>

<u>Phase - 3 Part - 1</u>

No OG	
No OG 1.1	Competency: Demographic and vital statistics- Birth Rate, Maternal Mortality & Morbidity
No OG 1.2	Competency: Define and discuss perinatal mortality and morbidity including perinatal and neonatal
	mortality and morbidity audit
No OG 2.1	Competency: Define and discuss still birth and abortion
No OG 8.4	Competency: Describe and demonstrate clinical monitoring of maternal and fetal well-being
No OG 8.6	Competency: Assess and counsel a patient in a simulated environment regarding appropriate nutrition in pregnancy
No OG 8.7	Competency: Enumerate the indications for and types of vaccination in pregnancy
No OG 8.8	Competency: Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy
No OG 9.2	Competency: Describe the steps and observe/ assist in the performance of an MTP evacuation
No OG 9.3	Competency: Discuss the aetiology, clinical features, differential diagnosis of acute abdomen in early pregnancy (with a focus on ectopic pregnancy) and enumerate the principles of medical and surgical management
No OG 9.4	Competency: Discuss the clinical features, laboratory investigations, ultrasonography, differential diagnosis, principles of management and follow up of gestational trophoblastic neoplasms
No OG 10.1	Competency: Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage
No OG 10.2	Competency: Enumerate the indications and describe the appropriate use of blood and blood products, their complications and management
No OG 12.1	Competency: Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.
No OG 12.7	Competency: Describe and discuss screening, risk factors, management of mother and newborn with HIV
No OG 13.1	Competency: Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito- anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of induction and acceleration of labor; management of third stage of labor.
No OG 13.2	Competency: Define, describe the causes, pathophysiology, diagnosis, investigations and management of preterm labor, PROM and postdated pregnancy
No OG 13.3	Competency: Observe/ assist in the performance of an artificial rupture of membranes
No OG 13.4	Competency: Demonstrate the stages of normal labor in a simulated environment / mannequin and counsel on methods of safe abortion.
No OG 13.5	Competency: Observe and assist the conduct of a normal vaginal delivery
No OG 14.2	Competency: Discuss the mechanism of normal labor, Define and describe obstructed labor, its clinical features; prevention; and management
No OG 14.4	Competency: Describe and discuss the classification; diagnosis; management of abnormal labor
No OG 15.1	Competency: Enumerate and describe the indications and steps of common obstetric procedures, technique and complications: Episiotomy, vacuum extraction; low forceps; Caesarean section, assisted breech delivery; external cephalic version; cervical cerclage
No OG 15.2	Competency: Observe and assist in the performance of an episiotomy and demonstrate the correct suturing technique of an episiotomy in a simulated environment. Observe/Assist in operative obstetrics cases – including - CS, Forceps, vacuum extraction, and breech delivery
No OG 16.1	Competency: Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage
No OG 17.2	Competency: Counsel in a simulated environment, care of the breast, importance and the technique of breast feeding
No OG 18.3	Competency: Describe and discuss the diagnosis of birth asphyxia Paed.
No OG 19.1	Competency: Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization
No OG 19.2	Competency: Counsel in a simulated environment, contraception and puerperal sterilisation
No OG 19.3	Competency: Observe/ assist in the performance of tubal ligation
No OG 19.4	Competency: Enumerate the indications for, describe the steps in and insert and remove an intrauterine device in a simulated environment

No OG 20.1	Competency: Enumerate the indications and describe and discuss the legal aspects, indications, methods for first and second trimester MTP; complications and management of complications of Medical Termination of Pregnancy
No OG 21.1	Competency: Describe and discuss the temporary and permanent methods of contraception, indications, technique and complications; selection of patients, side effects and failure rate including Ocs, male contraception, emergency contraception and IUCD
No OG 21.2	Competency: Describe & discuss PPIUCD programme
No OG 22.2	Competency: Describe and discuss the etiology (with special emphasis on Candida, T. vaginalis, bacterial vaginosis), characteristics, clinical diagnosis, investigations, genital hygiene, management of common causes and the syndromic management
No OG 24.1	Competency: Define, classify and discuss abnormal uterine bleeding, its aetiology, clinical features, investigations, diagnosis and management
No OG 25.1	Competency: Describe and discuss the causes of primary and secondary amenorrhea, its investigation and the principles of management.
No OG 26.2	Competency: Describe the causes, prevention, clinical features, principles of management of genital injuries and fistulae
No OG 27.4	Competency: Describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations, management and long term implications of Pelvic Inflammatory Disease
No OG 28.1	Competency: Describe and discuss the common causes, pathogenesis, clinical features, differential diagnosis; investigations; principles of management of infertility – methods of tubal patency, ovulation induction, assisted reproductive techniques
No OG 29.1	Competency: Describe and discuss the etiology; pathology; clinical features; differential diagnosis; investigations; principles of management, complications of fibroid uterus
No OG 30.1	Competency: Describe and discuss the etiopathogenesis; clinical features; differential diagnosis; investigations; management, complications of PCOS
No OG 31.1	Competency: Describe and discuss the etiology, classification, clinical features, diagnosis, investigations, principles of management and preventive aspects of prolapse of uterus
No OG 33.1	Competency: Classify, describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations and staging of carcinoma cervix
No OG 33.3	Competency: Describe and demonstrate the screening for cervical cancer in a simulated environment
No OG 33.4	Competency: Enumerate the methods of prevention of cancer of cervix including VIA, VILI Colposcopy
No OG 34.1	Competency: Describe and discuss aetiology, pathology, staging clinical features, differential diagnosis, investigations, staging laparotomy and principles of management of endometrial cancer
No OG 34.2	Competency: Describe and discuss the etiology, pathology, classification, staging of ovarian cancer, clinical features, differential diagnosis, investigations, principal of management including staging laparotomy
No OG 34.4	Competency: Operative Gynaecology: Understand and describe the technique and complications: Dilatation & Curettage (D&C); EA-ECC; cervical biopsy; abdominal hysterectomy; myomectomy; surgery for ovarian tumours; staging laparotomy; vaginal hysterectomy including pelvic floor repair; Fothergill's operation, Laparoscopy; hysteroscopy; management of postoperative complications
No OG 35.2	Competency: Arrive at a logical provisional diagnosis after examination.
No OG 35.3	Competency: Recognize situations, which call for urgent or early treatment at secondary and tertiary centres and make a prompt referral of such patients after giving first aid or emergency treatment.
No OG 35.12	Competency: Obtain a PAP smear in a stimulated environment
No OG 35.13	Competency: Demonstrate the correct technique to perform artificial rupture of membranes in a simulated / supervised environment
No OG 35.14	Competency: Demonstrate the correct technique to perform and suture episiotomies in a simulated/ supervised environment
No OG 36.2	Competency: Organise antenatal, postnatal, well-baby and family welfare clinics
No OG 36.3	Competency: Demonstrate the correct technique of punch biopsy of uterus in a simulated/ supervised environment
No OG 37.1	Competency: Observe and assist in the performance of a Caesarean section
No OG 37.4	Competency: Observe and assist in the performance of Dilatation & Curettage (D&C)
No OG 37.5	Competency: Observe and assist in the performance of Endometrial aspiration - endocervical curettage (EA-ECC)
No OG 37.6	Competency: Observe and assist in the performance of outlet forceps application of vacuum and breech delivery
No OG 37.7	Competency: Observe and assist in the performance of MTP in the first trimester and evacuation in incomplete abortion
No OG 40.1	Competency: Describe etiology, diagnosis and management of Fever in pregnancy & its impact on pregnancy

<u>Learning Objectives for Competency Based Undergraduate Curriculum for the Indian Medical Graduate</u>

<u>Phase - 3 Part - 2</u>

Competency: Describe and discuss the basic embryology of fetus, factors influencing fetal growth and
development, anatomy and physiology of placenta, and teratogenesis
Competency: Describe, discuss and identify pre-existing medical disorders and discuss their management;
discuss evidence-based intrapartum care
Competency: Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its
differential diagnosis, elaborate the principles underlying and interpret pregnancy tests.
Competency: Enumerate, describe and discuss the objectives of antenatal care, assessment of period of
gestation; screening for high-risk factors.
Competency: Describe and demonstrate clinical monitoring of maternal and fetal well-being
Competency: Describe and demonstrate pelvic assessment in a model
Competency: Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy
Competency: Classify, define and discuses the aetiology and management of abortions including
threatened, incomplete, inevitable, missed and septic abortion
Competency: Describe the steps and observe/ assist in the performance of an MTP evacuation
Competency: Discuss the aetiology, clinical features, differential diagnosis of acute abdomen in early
pregnancy (with a focus on ectopic pregnancy) and enumerate the principles of medical and surgical management
Competency: Describe the etiopathology, clinical features; diagnosis and investigations, complications,
principles of management of multiple pregnancies
Competency: Define, classify and describe the etiology and pathophysiology, early detection,
investigations; principles of management of hypertensive disorders of pregnancy and eclampsia,
complications of eclampsia.
Competency: Define, classify and describe the etiology, pathophysiology, diagnosis, investigations,
adverse effects on the mother and foetus and the management during pregnancy and labor, and
complications of anemia in pregnancy Competency: Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria
adverse effects on the mother and foetus and the management during pregnancy and labor, and
complications of diabetes in pregnancy
Competency: Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria
adverse effects on the mother and foetus and the management during pregnancy and labor, and
complications of diabetes in pregnancy
Competency: Define, classify and describe the etiology, pathophysiology, diagnosis, investigations, criteria
adverse effects on the mother and foetus and the management during pregnancy and labor, and
complications of heart diseases in pregnancy
Competency: Describe the clinical features, detection, effect of pregnancy on the disease and impact of the disease on pregnancy complications and management of liver disease in pregnancy
Competency: Describe the mechanism, prophylaxis, fetal complications, diagnosis and management of
isoimmunization in pregnancy
Competency: Enumerate and discuss the physiology of normal labor, mechanism of labor in occipito-
anterior presentation; monitoring of labor including partogram; conduct of labor, pain relief; principles of
induction and acceleration of labor; management of third stage of labor.
Competency: Define, describe the causes, pathophysiology, diagnosis, investigations and management of
preterm labor, PROM and postdated pregnancy
Competency: Enumerate and discuss the diameters of maternal pelvis and types
Competency: Discuss the mechanism of normal labor, Define and describe obstructed labor, its clinical
features; prevention; and management
Competency: Describe and discuss rupture uterus, causes, diagnosis and management.
Competency: Describe and discuss rupture uterus, causes, diagnosis and management. Competency: Describe and discuss the classification; diagnosis; management of abnormal labor Competency: Enumerate and describe the indications and steps of common obstetric procedures,
Competency: Describe and discuss rupture uterus, causes, diagnosis and management. Competency: Describe and discuss the classification; diagnosis; management of abnormal labor Competency: Enumerate and describe the indications and steps of common obstetric procedures, technique and complications: Episiotomy, vacuum extraction; low forceps; Caesarean section, assisted
Competency: Describe and discuss rupture uterus, causes, diagnosis and management. Competency: Describe and discuss the classification; diagnosis; management of abnormal labor Competency: Enumerate and describe the indications and steps of common obstetric procedures, technique and complications: Episiotomy, vacuum extraction; low forceps; Caesarean section, assisted breech delivery; external cephalic version; cervical cerclage
Competency: Describe and discuss rupture uterus, causes, diagnosis and management. Competency: Describe and discuss the classification; diagnosis; management of abnormal labor Competency: Enumerate and describe the indications and steps of common obstetric procedures, technique and complications: Episiotomy, vacuum extraction; low forceps; Caesarean section, assisted

No OG 16.1	Competency: Enumerate and discuss causes, prevention, diagnosis, management, appropriate use of blood and blood products in postpartum haemorrhage
No OG 16.2	Competency: Describe and discuss uterine inversion – causes, prevention, diagnosis and management.
No OG 16.3	Competency: Describe and discuss causes, clinical features, diagnosis, investigations; monitoring of fetal well-being, including ultrasound and fetal Doppler; principles of management; prevention and counselling in FGR
No OG 17.3	Competency: Describe and discuss the clinical features, diagnosis andmanagement of mastitis and breast abscess
No OG 18.1	Competency: Describe and discuss the assessment of maturity of the newborn, diagnosis of birth asphyxia, principles of resuscitation, common problems.
No OG 18.2	Competency: Demonstrate the steps of neonatal resuscitation in a simulated environment
No OG 18.3	Competency: Describe and discuss the diagnosis of birth asphyxia
No OG 18.4	Competency: Describe the principles of resuscitation of the newborn and enumerate the common problems encountered
No OG 19.1	Competency: Describe and discuss the physiology of puerperium, its complications, diagnosis and management; counselling for contraception, puerperal sterilization
No OG 19.2	Competency: Counsel in a simulated environment, contraception and puerperal sterilisation
No OG 19.3	Competency: Observe/ assist in the performance of tubal ligation
No OG 19.4	Competency: Enumerate the indications for, describe the steps in and insert and remove an intrauterine device in a simulated environment
No OG 20.1	Competency: Enumerate the indications and describe and discuss the legal aspects, indications, methods for first and second trimester MTP; complications and management of complications of Medical Termination of Pregnancy
No OG 20.2	Competency: In a simulated environment administer informed consent to a person wishing to undergo Medical Termination of Pregnancy
No OG 20.3	Competency: Discuss Pre-conception and Pre Natal Diagnostic Techniques (PC& PNDT) Act 1994 & its amendments
No OG 21.1	Competency: Describe and discuss the temporary and permanent methods of contraception, indications, technique and complications; selection of patients, side effects and failure rate including Ocs, male contraception, emergency contraception and IUCD
No OG 21.2	Competency: Describe & discuss PPIUCD programme
No OG 23.1	Competency: Describe and discuss the physiology of puberty, features of abnormal puberty, common problems and their management
No OG 23.2	Competency: Enumerate the causes of delayed puberty. Describe the investigation and management of common causes
No OG 23.3	Competency: Enumerate the causes of precocious puberty
No OG 24.1	Competency: Define, classify and discuss abnormal uterine bleeding, its aetiology, clinical features, investigations, diagnosis and management
No OG 25.1	Competency: Describe and discuss the causes of primary and secondary amenorrhea, its investigation and the principles of management.
No OG 26.1	Competency: Describe and discuss the etiopathogenesis, clinical features; investigation and implications on health and fertility and management of endometriosis and adenomyosis
No OG 26.2	Competency: Describe the causes, prevention, clinical features, principles of management of genital injuries and fistulae
No OG 27.1	Competency: Describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations, management and long term implications of sexually transmitted infections
No OG 27.2	Competency: Describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations, management and long term implications of genital tuberculosis
No OG 27.3	Competency: Describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations, management and long term implications of HIV
No OG 27.4	Competency: Describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations, management and long term implications of Pelvic Inflammatory Disease
No OG 28.1	Competency: Describe and discuss the common causes, pathogenesis, clinical features, differential diagnosis; investigations; principles of management of infertility – methods of tubal patency, ovulation induction, assisted reproductive techniques
No OG 28.2	Competency: Enumerate the assessment and restoration of tubal patency
	Competency: Describe the principles of ovulation induction
No OG 28.3	
No OG 28.3 No OG 28.4	Competency: Enumerate the various Assisted Reproduction Techniques

No OG 30.1	Competency: Describe and discuss the etiopathogenesis; clinical features; differential diagnosis; investigations; management, complications of PCOS
No OG 30.2	Competency: Enumerate the causes and describe the investigations and management of hyperandrogenism
No OG 31.1	Competency: Describe and discuss the etiology, classification, clinical features, diagnosis, investigations, principles of management and preventive aspects of prolapse of uterus
No OG 32.1	Competency: Describe and discuss the physiology of menopause, symptoms, prevention, management and the role of hormone replacement therapy.
No OG 32.2	Competency: Enumerate the causes of postmenopausal bleeding and describe its management
No OG 33.1	Competency: Classify, describe and discuss the etiology, pathology, clinical features, differential diagnosis, investigations and staging of carcinoma cervix
No OG 33.2	Competency: Describe the principles of management including surgery and radiotherapy of Benign, Premalignant (CIN) and Malignant Lesions of the Cervix
No OG 33.3	Competency: Describe and demonstrate the screening for cervical cancer in a simulated environment
No OG 33.4	Competency: Enumerate the methods of prevention of cancer of cervix including VIA, VILI Colposcopy
No OG 34.1	Competency: Describe and discuss aetiology, pathology, staging clinical features, differential diagnosis, investigations, staging laparotomy and principles of management of endometrial cancer
No OG 34.2	Competency: Describe and discuss the etiology, pathology, classification, staging of ovarian cancer, clinical features, differential diagnosis, investigations, principal of management including staging laparotomy
No OG 34.3	Competency: Describe and discuss the etiology, pathology, classification, staging, clinical features, differential diagnosis, investigations and management of gestational trophoblastic disease
No OG 34.4	Competency: Operative Gynaecology: Understand and describe the technique and complications: Dilatation & Curettage (D&C); EA-ECC; cervical biopsy; abdominal hysterectomy; myomectomy; surgery for ovarian tumours; staging laparotomy; vaginal hysterectomy including pelvic floor repair; Fothergill's operation, Laparoscopy; hysteroscopy; management of postoperative complications
No OG 35.1	Competency: Obtain a logical sequence of history, and perform a humane and thorough clinical examination, excluding internal examinations
No OG 35.2	Competency: Arrive at a logical provisional diagnosis after examination.
No OG 35.3	Competency: Recognize situations, which call for urgent or early treatment at secondary and tertiary centres and make a prompt referral of such patients after giving first aid or emergency treatment.
No OG 35.4	Competency: Demonstrate interpersonal and communication skills befitting a physician in order to discuss illness and its outcome with patient and family
No OG 35.5	Competency: Determine gestational age, EDD and obstetric formula
No OG 35.6	Competency: Demonstrate ethical behavior in all aspects of medical practice
No OG 35.7	Competency: Obtain informed consent for any examination / procedure
No OG 35.8	Competency: Write a complete case record with all necessary details
No OG 35.9	Competency: Write a proper discharge summary with all relevant information
No OG 35.10	Competency: Write a proper referral note to secondary or tertiary centres or to other physicians with all necessary details.
No OG 35.12	Competency: Obtain a PAP smear in a stimulated environment
No OG 35.14	Competency: Demonstrate the correct technique to perform and suture episiotomies in a simulated/ supervised environment
No OG 35.15	Competency: Demonstrate the correct technique to insert and remove an IUD in a simulated/ supervised environment
No OG 35.16	Competency: Diagnose and provide emergency management of antepartum and postpartum hemorrhage in a simulated / guided environment
No OG 35.17	Competency: Demonstrate the correct technique of urinary catheterisation in a simulated/ supervised environment
No OG 36.1	Competency: Plan and institute a line of treatment, which is need based, cost effective and appropriate for common conditions taking into consideration (a) Patient (b) Disease (c) Socio-economic status (d) Institution/ Governmental guidelines.
No OG 36.2	Competency: Organise antenatal, postnatal, well-baby and family welfare clinics
No OG 36.3	Competency: Demonstrate the correct technique of punch biopsy of uterus in a simulated/ supervised environment
No OG 37.1	Competency: Observe and assist in the performance of a Caesarean section
No OG 37.2	Competency: Observe and assist in the performance of Laparotomy

No OG 37.3	Competency: Observe and assist in the performance of Hysterectomy – abdominal/vaginal
No OG 37.4	Competency: Observe and assist in the performance of Dilatation & Curettage (D&C)
No OG 37.5	Competency: Observe and assist in the performance of Endometrial aspiration - endocervical curettage (EA-ECC)
No OG 37.6	Competency: Observe and assist in the performance of outlet forceps application of vacuum and breech delivery
No OG 37.7	Competency: Observe and assist in the performance of MTP in the first trimester and evacuation in incomplete abortion
No OG 38.1	Competency: Observe different Laparoscopy Surgery
No OG 38.2	Competency: Observe Hysteroscopy
No OG 38.3	Competency: Laparoscopic sterilization
No OG 38.4	Competency: Assess the need for and issue proper medical certificates to patients for various purposes
No OG 39.1	Competency: Examine a rape victim and complete medico-legal formalities

MGM INSTITUTE OF HEALTH SCIENCES ASSESMENT OBSTETRICS AND GYNAECOLOGY DEPARTMENT CBME MBBS Phase- III, Part- 2 University Question Paper Format for OBGY

Paner: T Marks: 100 Time: 03 Hours (30 Min for MCO)

ABOUT THE BOOK

This book is a companion guide for mastering the skills of history taking in subject of obstetrics and gynaecology. It will be the best compass for under graduate and postgraduate medical students in their journey of "reaching to a diagnosis". The book displays all aspects of history taking in pregnant and non-pregnant women with special reference to vocabulary and sentence formation. The last section of book is unique and includes commonly used colloquial words related to different symptoms, in different language scripts mainly Hindi, Marathi, Gujarati, Punjabi, Kannada, Telagu, and Bengali. This book will help students establishing effective communication with the patients and also in systematic recording and presenting the history.

ABOUT THE AUTHOR

Dr. Swati Shiradkar

MS OBGY, PhD in adolescent sexuality education.

Professor, Department of Obstetrics and Gynaecology

MGMIHS's MGM Medical college, Aurangabad, Maharashtra

A recognised undergraduate, postgraduate teacher, and PhD gui-

de, who has mentored and guided thousands of medical students in their journey of becoming good doctors.

Contributed many chapters in subject textbooks of OBGY and hundreds of articles on various subjects related to women's health in newspapers and magazines. She has efficiently headed her department for 30 years and is a teacher par excellence, a skilled surgeon, an empathetic thorough clinician, a passionate adolescent counselor, an expert trainer, a keen educationist and an inspiring GURU.

Dr. Gauri Bapat (Vaishnav)

DGO, DNB, IBCLC, FAIMER fellow

Associate Professor, Department of Obstetrics and Gynaecology MGMIHS's MGM Medical college, Aurangabad, Maharashtra, India An experienced dedicated teacher with special interest and expertise in medical education technology. She is an enthusiastic.

fellow in FAIMER- Foundation for Advancement of International Medical Education and Research, working on modifications and innovations in medical education. Well known for her professional devotion, insightful poetry and compassionate counseling skills
